

BRADY & MORRIS ENGINEERING CO. LTD.

Brady & Morris Engineering Co. Ltd, a subsidiary of W.H. Brady & Co. Ltd. started operations in 1946. Considered India's premier material handling equipment designing and manufacturing company, it has been bringing value to its investors for over 50 years by being listed on the Bombay Stock Exchange.

Accredited with an ISO 9001:2008 certification, the company is rated as a top vendor for high quality standardised and customised components, equipment and precision products. Specifically, the company specialises in the following material handling equipment:

- Overhead, Goliath and Jib Cranes
- Electric Wire Rope & Chain Hoists
- Manual Chain Hoists and Trolleys
- Hydraulic Pallet Trucks
- Electric Winches

Moreover, the company's strength lies in providing a complete material handling solution for various infrastructure projects. We have been involved in multiple projects in industries as varied as Steel, Chemicals, Cement, Power, Textiles, Metals and Minerals etc. Within these industries, we cater to India's largest and most well respected companies such as TISCO, Tata group of Companies, Reliance Industries, Larsen & Toubro, Vedanta Group, Aditya Birla Group etc. Additionally, our brand, 'Morris,' is associated with the highest safety and quality standards, constituting a major portion of our revenue.

The company has a network of branches, dealers and distributors all over India with its Headquarter located in Mumbai. This pan India presence allows the company to service every corner of the country. Also, the company runs two production bases in Ahmedabad and recently acquired land in Orissa to establish a factory in Eastern India.

'Quality, our Legacy,' the anchor of our corporate philosophy, enables Brady & Morris Engineering Co. Ltd. in not only converting engineering dreams a reality through our designing arm but it also ensures that we manufacture and supply the highest quality products on time.
